

Guhesh Panjagall

Full-Stack Developer

Full-Stack Developer with 1+ year of experience specializing in the **MERN stack** (MongoDB, Express.js, React.js, Node.js). Proven ability to architect robust web applications and optimize **RESTful APIs** for performance and scalability. Skilled in microservices architecture and back-end development with **Node.js**. Proficient in building intuitive, responsive interfaces using modern front-end technologies. Automated testing workflows using **Jest**, cutting manual testing efforts by 50% and improving quality control. Experienced in using **Git**, **BitBucket**, and **JIRA** for version control and project management.

SKILLS

HTML5

CSS3

JavaScript

React.js

MangoDB

Express.js

Node.js

MySQL

PostgreSQL

Bootstrap5

Tailwind CSS

Redux Toolkit

RESTful API

Jest

Git

Git Hub

BitBucket

Firebase

Jira

Python

PROFESSIONAL SUMMARY

- Experienced in building web applications using the **MERN Stack**, including MVC architecture, routing, controllers, models, components, and libraries.
- Strong understanding of relational databases (**MySQL**, **PostgreSQL**) and **NoSQL databases (MongoDB)** experience in designing and optimizing database schemas.
- Familiarity with **React.js**, **JavaScript ES6+**, **HTML5**, **CSS3**, and frontend frameworks like **Bootstrap 5**, **Tailwind CSS**, for building responsive and user-friendly interfaces.
- Ensured high code quality through **unit and integration testing** with **Jest**, focusing on **troubleshooting, debugging, and performance optimization**.
- Experienced in designing and maintaining high-performance web applications and crafting RESTful APIs for smooth client-server interactions. Extensive knowledge of ReactJS, JSX, Babel, data structures, and algorithms.
- Proficient in using **Git** and **BitBucket** for version control, including branching, merging, and collaboration with team members on code repositories. and experienced in using **JIRA for Project management**
- Engineered and maintained a suite of **unit and integration tests** using **Jest**, ensuring high code reliability and further automating testing workflows to enhance efficiency.
- Experienced in System Design & Architecture, **Data Modeling**, **Code Review**, and **Security Implementation**.
- Led coordination efforts with **cross-functional teams**, applying structured **communication** and **problem-solving** techniques to deliver end-to-end user experiences and achieve project milestones.
- Adopted and integrated new technologies and industry **best practices, continuously learning** and applying updated methods to enhance performance, scalability, and adaptability in dynamic environments.

PROJECTS

NetflixGPT:- Technologies Used: (React, Tailwind CSS, Firebase, TMDB API, OpenAI API, Redux.)

Designed and built a movie recommendation and streaming platform featuring user authentication, API integrations, and custom hooks for data handling. Implemented multi-language support and resolved complex user profiles and log in.

YouTube:-

Technologies Used: React, Tailwind CSS, Youtube API, Redux Toolkit

- Enhanced Search Functionality: Used debouncing, caching, and memoization to reduce redundant API calls by 15% and improve response times by 20%, surpassing performance of similar features in platforms like Flipkart.
- Implemented scalable real-time features by creating a real-time chat system using API polling, managing high user concurrency similar to YouTube's live chat.
- Enhanced User Experience with Infinite Scrolling: Implemented infinite scrolling for video loading, ensuring a seamless user experience with efficient memory management.
- Efficient Nested Comments Handling: Built a recursive algorithm to manage threaded comments, optimizing memory usage for multi-level comment hierarchies.
- Secured Application: Safeguarded API keys and sensitive data using environment variables, adhering to industry best practices.

WORK EXPERIENCE

Full stack Developer

WEDDING CLUSTER PVT LTD

09/2023 – Present

- Developed a scalable and responsive full-stack web application from scratch to production using React.js, Node.js, Express.js, and MySQL in a MERN stack environment.
- Architected and implemented a microservices-based solution, enhancing modularity and scalability with RESTful APIs. Streamlined development across 4 teams and reduced integration time by over three hours per project.
- Designed and maintained complex database structures utilizing both SQL (MySQL, PostgreSQL) and NoSQL (MongoDB, DynamoDB) for efficient data storage and retrieval.
- Led the development of critical features including authentication, SMS, email, and WhatsApp integrations, with a focus on secure software design and web application security.
- Engaged in project planning, technical documentation, and cross-functional collaboration using Agile methodologies and JIRA for project management.
- Performed unit testing with Jest, conducted optimized code reviews, and provided debugging and troubleshooting support to ensure high code quality.
- Contributed to system design and architecture, excelling in both front-end and back-end development with JavaScript ES6+, HTML5, and CSS3.
- Delivered innovative solutions within team environments, contributing to high-impact projects by applying technical expertise, strong problem-solving abilities, and effective communication to address real-world challenges while continuously acquiring new knowledge.

EDUCATION

Bachelor of Engineering (BE) in Information Science and Engineering.

KLS Gogte Institute of Technology, Belgavi, Karnataka, India. (2020 - 2024)

Graduated with **8CGPA**
